Re: Selection of Preferred Alternative
ALL-SR 309-18.19/23.33 (PID 110428)
S.R. 309 at Thayer Rd. and S.R. 309 at Napoleon Rd. Intersection Improvements

Dear Property Owner:

The Ohio Department of Transportation (ODOT) District 1 has chosen a single lane roundabout design to improve safety at the intersections of State Route 309 at Thayer Road and State Route 309 at Napoleon Road in Allen County. This option was the recommended preferred alternative presented at the public meeting on January 22, 2020 to improve intersection safety.

The decision was made after ODOT and its consultant, Jacobs Engineering of Cincinnati, gathered feedback on the alternatives presented during the public meeting. The project is currently scheduled for construction in 2022.

The project website, <https://tinyurl.com/SR309Intersections>, will be updated as the final design and construction information becomes available.

Respectfully,

Beth Clark, P.E.
Project Manager
