

The Texas A&M National Emergency Response and Rescue Center will present a series on Cybersecurity at Rhodes State College July 23-24. This two-day/12-hour program will include the following topics on these dates:

ESSENTIALS OF COMMUNITY CYBERSECURITY

**Tuesday, July 23
8:00am to 12noon**

During this 4-hour program, we will cover:

- Why Cybersecurity is important
- Unstructured threats
- Structured threats
- Highly structured threats
- The Community Cybersecurity Maturity Model (CCSMM)
- Things a community can do to initiate a Cybersecurity program
- Where to go for help

This program provides information related to Community Cybersecurity. Participants will examine the different types of cyber attacks, how communities are vulnerable to cyber attacks and incidents, and what types of organizations are most likely to be targeted. This course will also introduce the participants to the Community Cyber Security Maturity Model and how to use the model to build a Community Cybersecurity program and their cyber resilience.

COST \$25
includes lunch
July 23

UNDERSTANDING TARGETED CYBER ATTACKS

**Tues., July 23 • 1:00 to 5:00pm (Part-1)
Wed., July 24 • 8:00am to 12noon (Part-2)**

This program provides participants with specific information regarding targeted cyber attacks, including advanced persistent threats. This information will place them in a better position to plan and prepare for, respond to, and recover from targeted cyber attacks. This course will fill the gap in threat-specific training for cybersecurity as a community-driven course that focuses on the phases of targeted cyber attacks and the attacker methods used during each phase. Participants will also receive valuable information on cyber attack prevention, mitigation and response.

Who Should Attend?

**DEADLINE TO REGISTER FOR BOTH SERIES IS
JUNE 21**
